Skills

- **FRONT END DEVELOPMENT**: HTML | CSS | JavaScript | TypeScript | ReactJs | NextJs | Bootstrap | Tailwind CSS | Sass
- **BACK END DEVELOPMENT**: NodeJs | Express
- **DATABASE**: MongoDB | Prisma | Sanity
- **SOFT SKILLS**: Time Management | Creative Thinking | Team player | Deliver results

Experience

Full-Stack JavaScript Intern   **Code Desk**   *Skopje, Macedonia* **07/2023 - 11/2023**

- Collaborated on the creation and enhancement of user interfaces using HTML, CSS, and JavaScript.
- Translated design mockups into functional web pages, working closely with senior developers.
- Contributed to seamless integration of frontend and backend processes.
- Utilized JavaScript frameworks and tools to implement dynamic features.
- Communicated progress and challenges effectively within a collaborative team environment.

Print Production Specialist   **Print House Evropa 92**   *Kochani, Macedonia* **01/2016 - present**

- Spearheaded pre-press operations, ensuring high-quality printing using CTP technology.
- Managed digital printers and maintained quality standards for print materials.
- Optimized workflows between pre-press, design, and production teams for efficiency.

Education

Bachelor of Computer Science   **University "Goce Delcev"**   *Shtip, Macedonia* **09/2009 - 03/2014**

Certified Full-Stack JavaScript Developer   **Code Academy**   *Skopje, Macedonia* **03/2023 - 11/2023**

- Completed a 7-month Full-Stack JavaScript training program mastering various modules.

Projects

Food Ordering App:

- Led the development of a modern food ordering application using a tech stack consisting of Next.js for frontend, MongoDB for database management, and Express for backend.
- Aimed to provide users with a seamless ordering experience across all devices.
- Spearheaded the end-to-end development process, from conceptualization to deployment.
- Implemented secure user authentication mechanisms to safeguard user data and privacy.
- Designed and developed an intuitive admin dashboard to streamline menu item management, categories, and order tracking for administrators.

GitHub | Live Demo

Blog Full-stack App:

- Developed a dynamic blogging platform leveraging Next.js for frontend rendering and MongoDB for data storage.
- The goal of this project was to create a user-friendly platform for writers to publish their content and for readers to explore and engage with articles seamlessly.
- Orchestrated the entire development lifecycle, from planning and design to implementation and deployment.
- Implemented robust user authentication features to ensure content security and user privacy.
- Optimized the platform's performance to provide fast and responsive user interactions.
